

Integrated Management System Policy

Our mission: is to be a fundamental pillar in animal nutrition and the leather industry, either through the production of vitamins intended to complement food production worldwide, as well as the production and supply of specific products for leather tanning. . Occupying a place of destiny in the world market, Dirox S.A is positioned as one of the best global companies in the industry, in terms of product quality and commercial reliability.

Our vision: is permanent evolution, using new technologies to improve the quality and sustainability of production, develop new products, improve energy efficiency, respecting our surroundings and the environment, preserving the safety and health of our collaborators, you will need the necessary framework for the achievement of the objectives, which allow the continuous improvement of the entire integrated management system.

Our values: are based on honesty, consolidation of efforts to establish and achieve common goals, a good working environment within the company based on mutual respect, social solidarity, consideration for our employees and their families, respect for the country, values and its institutions

For this we commit to:

- provide safe and healthy working conditions to our collaborators,
- protect the environment, preventing environmental pollution
- ensure compliance with existing or future legal and other requirements,
- Ensure the participation and consultation of our collaborators.
- Generate the conditions that guarantee the production of vitamins, complying with current quality and feed safety parameters, as well as the prevention of possible acts of fraud and defense.
